MENA Region Cooling Status Report: Progress, Opportunities, and Insights

The Cool Up programme will host a one-hour webinar to introduce our latest report and provide insights that lay the foundation for action on sustainable cooling across the Middle East and North Africa region. Join us on 18 May for an engaging conversation with regional experts and an opportunity to ask questions.

Cool Up's *MENA Region Cooling Status Report* is the first of its kind to provide an overview of the state of sustainable cooling in the region. The report closes knowledge gaps by addressing progress, opportunities, and insights on the topic from the perspectives of policy, technology, markets, and finance.

Progress is being made across the MENA region, however, there are still numerous opportunities to ramp up ambition and deployment of sustainable cooling technologies. As the region is warming at twice the global average, these solutions are required more than ever to meet increasing demand while limiting the adverse impacts on the ozone layer and the climate.

Speakers

Dr. Nesen Surmeli-Anac, *Guidehouse*

Mohamed Abdelhameed, *RCREEE*

Nabil Shahin, *AHRI*

Moderator: Kristen Brand, Guidehouse
